---

*Please assemble the bed **on a soft surface (e.g. a carpet or blanket)** to avoid damages.*

1. Insert connector housings and screw steel dowels into side rails, crossbars, head and footboards. Align dowels and housings correctly!

2. Mount the bed feet to the crossbar. Attach the crossbars to one of the side rails. Fix the connection with grub screws. Mount the second side rail the same way.

3. Mount headboard and footboard.

4. Fix the support bars and center rail with Confirmat screws. Choose the right distance block and secure the block with Spax screws in the right length (5x100, 6x140, 6x180).

without distance block: insertion depth 24,5 cm
horizontal big distance block: insertion depth 18,5 cm
vertical big distance block: insertion depth 14,5 cm
both distance blocks: insertion depth 10,5 cm

5. Screw the sleeve nuts onto the threaded rods (short threaded rods only for lowest position). Choose the right distance blocks according to the insertion depth. Position the center support feet under the crossbars and screw in the threaded rods while holding the center support feet. Adjust the height of the center support feet.
6. Place the cover at one corner and fix it with the hook-and-loop fastener. Afterwards place the cover around the whole bed frame und fix it with the hook-and-loop-fastener from the corners to the middle of the bed starting at the lower edge of the bed frame und pulling it upwards.
